

HOW TO BET SOCCER

Soccer game wagers are official at the end of a full soccer match (90 minutes of regulation play, plus referee stoppage time). Only the initial 90-minute period + Referee Stoppage time is considered for soccer wagers.

Soccer games are offered as either two-way (Team A or Team B) or three-way propositions (Team A, Team B or Draw).

EXAMPLE:

<u>TEAM</u>	<u>MONEY LINE</u>	<u>SPREAD</u>	<u>TOTAL</u>
Arsenal	-115	-½ -115	2 ½ OV -100
Chelsea	+310	+½ -105	2 ½ UN -120
Draw	+250		

MONEY LINE: In the 3-way example Money Line example listed above, the Arsenal is offered at -115 (wager \$115 to win \$100), Chelsea is +310 (wager \$100 to win \$310), and the Draw is +250 (wager \$100 to win \$250). (90 minutes of regulation play, plus referee stoppage time).

SPREAD: In the 2-way example for the spread, when betting the favorite, your team must cover the spread by winning by more goals than what is listed in the spread. If you bet the Arsenal to win on the spread line, they must win by one goal or more. If you bet on the underdog, Chelsea, they must either win or tie (lose by less than the point spread listed). (90 minutes of regulation play, plus referee stoppage time).

TOTAL: In this example, the total (Over/Under) is 2 ½. You can wager that the score of both teams combined, for the 90-minute regulation play, will be either over 2 ½ goals or under 2 ½. Wagering \$100 on the Over will pay back \$100 in winnings. On the Under bet, you would have to bet \$120 to win \$100. (90 minutes of regulation play, plus referee stoppage time).

ASIAN HANDICAP: The Asian Handicap is a form of wagering two handicaps.

<u>TEAM</u>	<u>ASIAN HANDICAP</u>
Team A	-.75
Team B	+.75

EXAMPLE: Team A is -.5 and -1 goal, while Team B is +.5 and +1 goal. If you are placing a wager on Team A in an Asian Handicap you are placing half of your wager on Team A is at -.5 and half on Team A at -1. If they win by exactly one goal you would win your -.5 wager and push or tie on your -1 wager.

The Asian Handicap can be expressed as either two numbers split (-.5 and -1) or a quarter number. In the example below it would be Team A -.75. The following is the two display versions of the Asian Handicap:

EXAMPLE:

-0.25 = pick and -0.5
+0.25 = pick and +0.5
-0.75 = -0.5 and -1
+0.75 = +0.5 and +1
-1.25 = -1 and -1.5
+1.25 = +1 and +1.5

OFF THE BOARD PARLAYS (FOR ALL SPORTS): These wagers are calculated using true odds payoffs. If you bet four teams off the board and all of them are listed at -110, your payout would be 13.3 for 1, which is more generous than the parlay card payout of 12 for 1.
